# Process

- HTML, CSS, JS, Bulma, Open Weather API, Zomato API
- Breakdown of tasks and roles
- Challenges
- Successes

# Plan Your Perfect Vacation

## Tasks Before You Go

Please enter your first name.

## Eateries to Checkout

Restaurant Finder

# Directions for Future Development

- Allow the user to pick their own location after they pick a theme
  - This enhancement would allow the user to pick any location and view the same results
- Allow the user to plan activities once they pick their location
  - Adding a server that holds activities to do in users location
- Allow the user to plan their transportation after they pick their location
  - This would allow the user to plan airfare and/or rental car options within our application
- Allow the user to book hotel reservations
  - This would allow the user to book reservations within our application
- Allow the user to share their vacations (either with others or on social media)
  - This would allow the user to share their vacations on facebook, instagram or any other form of social media for their friends to see their upcoming planned vacation
